@INPROCEEDINGS{6374783,
author={Baldassin, A. and de Carvalho, J.P.L. and Garcia, L.A.G. and Azevedo, R.},
booktitle={Computer Architecture and High Performance Computing (SBAC-PAD), 2012 IEEE 24th International Symposium on},
title={Energy-Performance Tradeoffs in Software Transactional Memory},
year={2012},
month={Oct},
pages={147-154},
keywords={multiprocessing systems;parallel programming;power aware computing;software performance evaluation;storage management;transaction processing;DVFS-based technique;DVFS-enhanced policy;EDP reduction;STAMP workload;computer system;conflict resolution scheme;dynamic voltage and frequency scaling;energy consumption;energy tradeoff;energy-delay product;energy-performance tradeoff;lock-based STM algorithm;multicore processor;parallel programming;resolution policy;runtime performance;runtime tradeoff;software implementation;software transactional memory system;synchronization mechanism;Algorithm design and analysis;Bioinformatics;Delay;Energy consumption;Genomics;Program processors;Energy Consumption;Parallel Computing;Transactional Memory},
doi={10.1109/SBAC-PAD.2012.19},
ISSN={1550-6533},}
